**T**HE PUBLISHERS take pleasure in presenting herewith the Tenth Annual Edition of Henderson's Regina Directory. A work of this kind to be valuable must, in all respects, be thoroughly reliable and up-to-date; fully conscious of these essentials, the publishers have taken every precaution to secure accuracy of information.

The Edition embraces the area of GREATER REGINA, comprising the territory of the city proper and all adjoining subdivisions.

Attention is directed to the Miscellaneous Section in the front part of the volume, containing up-to-date statistics and information, much of which is not to be found elsewhere in print.

The Advertising Section, together with the Classified Directory, contains a complete alphabetically arranged list of all articles manufactured and sold in Regina, which forms a most efficient wholesale and retail buyer's guide.

The value of the street section is often unappreciated by some who desire to find a certain house on a street unfamiliar to them to the extent it should be. By application of the following example the location of any street number can be found expeditiously: Suppose 2159 Smith Street is wanted: refer to street section Smith Street—glance down to 2159, then to the nearest intersection to 2159. It will be found that this number is on the east side of the street, five houses north of 14th Avenue, between 13th and 14th Avenues.

## ADVERTISING REGINA

The Regina Directory is placed in the Directory and Public Libraries throughout the United States and Canada, where it serves the public as a valuable book of reference and the City it represents as a splendid standing advertisement, for no other publication can convey such an idea of the City, its business interests and all its various institutions and organizations. Few people realize what splendid publicity this affords Regina and its industries.

The Publishers desire to thank their patrons and the general public for the courtesy extended at all times to their representatives, and to say that they fully appreciate the confidence which the business and professional men of Regina have always shown in their publications.

# CITY OF REGINA

Regina is situated in lat. 50.30, long. 105, 357 miles west of Winnipeg and 1,125 miles east of Vancouver, and is served by the three transcontinental lines, viz., the Canadian Pacific, the Canadian Northern and the Grand Trunk Pacific railways.

Regina was incorporated as a city on June 19, 1903, and is now the capital and seat of government of the Province of Saskatchewan.

The Parliament Buildings, the erection of which was commenced in the fall of 1908, stands in its own grounds of about 160 acres, south of Wascana Lake and within the city limits.

It has well been said that there are no parliament buildings more dignified or better adapted to the needs of legislative work than those of the Saskatchewan capital.

The building is constructed of Tyndall stone, fireproof throughout, and was erected by Peter Lyall & Sons, of Montreal, at a cost to date of approximately \$1,900,000, the erection being commenced in the fall of 1908, and the departmental offices occupied in the fall of 1910. The length of the building is about 543 feet, and the height of the dome approximately 187 feet. The central portion is 98 feet in width and 267 feet in depth with a wing on either side, each 222 feet long and 72 feet in depth.

The City Council is composed of a Mayor and ten Aldermen. The Mayor is elected annually by a vote of the entire city, and commencing with the Municipal Election of December, 1914, the Aldermen have also been elected from the city at large. Prior to that time they were elected annually from the five wards of the city, two representatives to each ward. The bylaw making this change was ratified by the electors on the 10th of August, 1914, and provided for the abolition of the ward system and for the reversion to the system of the election of aldermen by a general vote of the electors.

Regina is undoubtedly the financial centre of the province, and its development in this respect is very remarkable. Fourteen of the leading Canadian banks now have branches in the city, several having two, the majority of them having erected substantial and elaborate offices of their own.

Practically every loaning institution of importance in Canada has an office in the city, many of them occupying their own building.

The Bank Clearing House Association was established in 1909 and the clearings for 1911 were \$73,032,088, an increase of 46 per cent. over 1910, placing Regina as the second city in the Dominion in this respect, Edmonton being first with an increase of 70 per cent. The clearings for 1912 were \$115,727,648, showing an increase over 1911 of \$42,695,560. The clearings for 1913 were \$132,087,457, showing an increase of \$16,359,809 over those of 1912, and being the largest turnover the Clearing House has ever recorded. The clearings for 1914 were \$98,205,541.65, and notwithstanding the unprecedented financial conditions created by the war the clearings for 1915 were \$87,122,611. In 1916 the clearings were even greater, being \$124,349,589.

A very large volume of business is transacted in the purchase and sale of bonds and debentures of the municipalities and school districts of Manitoba, Saskatchewan and Alberta.

Regina is justly entitled to be termed one of the best served railway cities in Western Canada. Twelve lines of railway radiate in all directions from the city, and the C.P.R., C.N.R. and G.T.P. vie with each other in their endeavor to give Regina an excellent train service.

The Great Northern Railway will have direct communication between Regina, Minneapolis, St. Paul and other southern cities over the G.T.P. Railroad Boundary Line. In addition to the lines in operation, bonds have been guaranteed by the Provincial Government for ten additional branch lines which, when completed, will make a total of twenty-two railway lines radiating in all directions from Regina. A new union depot for the C.P.R. and C.N.R., thoroughly modern and up-to-date in every particular, has been erected and is now in use, but the C.N.R. has acquired considerable property in the east end of the city, and it would seem probable that this company will erect a passenger depot of its own in the near future.

The G.T.P. plans under way include the erection of a station, a magnificent hotel, power house, laundry, train sheds and underground tunnel, to cost in all approximately \$2,000,000. The foundation and steel work for the hotel has been started. This investment, made by a company such as the G.T.P., speaks volumes for its faith in the city's future.

Owing to its geographical situation in the heart of the grain growing district of Western Canada and with unequalled railway facilities, Regina is one of the largest distributing points for agricultural implements in the world, and practically every Canadian and American implement manufacturing firm of any importance has its agency in the city. The advantages for the distribution of other lines of goods are on a par with those for agricultural implements, and Regina has some 36 manufacturing concerns, some 114 wholesale and over 360 retail houses.

The city is a firm believer in municipal ownership and owns its street railway, of which it has some 30 miles constructed within the city limits; light and power plant, supplying cheap light and power; and water system, the water being obtained from springs distant some eight miles. With regard to the two last mentioned utilities, the city has planned the expansion of the present systems so that, when complete, they will provide for a population many times the number of the present one, supply sufficient power and provide adequate fire protection throughout the city.

In connection with cheap power the city in 1914 entered into an agreement with Messrs. Coste & McAuley for the supply of natural gas. The city intends to arrange for the distribution of the gas within its limits, retaining full control of the utility as it has done with its other utilities.

During 1914 the city extended its municipal ownership still further by the establishment of a Municipal Stock Yards on a scale

sufficiently large to accommodate all the livestock raised in the province. The yards were opened in September, 1914, and considerable business has been carried on. The ultimate aim of the city, however, is the provision of an up-to-date stock yard to furnish a good market for all stock raised in the country tributary to the city.

The City's Public Market, under the control of the Local Council of Women, contributes in no small measure to the welfare of the residents for Regina and to the people in the districts surrounding the city, in providing an open market for the sale and purchase of all kinds of supplies at first cost.

As a residential centre, Regina offers every inducement to the homeseeker. In this respect it has been referred to as "the City of Beautiful Homes."

From the educational and social points of view the city also offers every advantage. With a population of about 40,000, the city has the Regina College, St. Chad's College and the Provincial Government Normal School, all carried out in Gothic treatment, and a Collegiate Institute of classic design. A magnificent college is projected by the Presbyterians, their scheme including the purchase of some three of four hundred acres of ground on which to erect college buildings at a cost of about \$1,000,000, making provision for the education of both sexes, also a hospital and other buildings in connection with same. The Roman Catholics have also expressed their intention of erecting a substantial college. From these points it will be seen that the city although not fortunate enough to possess the Provincial University, may claim to be the educational centre of the province. In addition to the above, there are some 13 public and separate schools, 29 churches, Y.M.C.A. and Y.W.C.A.; two public hospitals and several private nursing homes; a public library with two branches; several business colleges and numerous societies for the advancement of art, music, literature and science, one daily morning paper, one daily evening paper, two weekly papers and several monthly trade publications.

As to amusements, the city has a first-class theatre and some three moving picture theatres. The lake adjoining the parliament buildings offers facilities for boating, bathing and skating. Many fraternal societies and other organizations exist, devoted to amateur theatricals, cards, debates, etc. The city is within easy distance of Last Mountain and Katepwa Lakes, two of the beauty spots of the province, and delightful holiday resorts, offering unequalled facilities for bathing, fishing and boating.

Regina is one of the best paved cities in Canada for its size, having some 30 miles of paved streets, 75 miles of graded streets; 42 miles of granolithic and 72 miles of plank sidewalks. The city also has 69 miles of sewer with 5,976 connections; 72 miles of water mains with 511 hydrants and 5,933 house connections; 4 fire stations with some 36 firemen and a full equipment of the most modern fire fighting apparatus, some 257 acres of parks, a trunk sewer and sewage disposal works, and an incinerator plant for the disposal of garbage.

Regina's Municipal Buildings would do credit to a far larger city. The funds for their erection have been to a great extent provided by the sale of the townsite lands, yet the city still possesses an asset in its unsold warehouse property which is assessed at some \$2,112,030.

## STREET RAILWAY

The construction of the street railway as a municipal enterprise was projected in 1910. Actual construction began in the early part of 1911 and operation of cars on same was commenced July 29, 1911. At this time the system consisted of about six miles of tracks and six cars. At the present time there are about 30 miles of track within the city limits, 14¾ miles of this being in pavement. The rolling stock is as follows:

34 passenger cars

2 sweepers

1 snow plow

1 motor haulage car

30 freight cars

Total expenditure up to December 31, 1914, was \$1,723,830, of which \$266,065 was for cars and car equipment.

Operation statistics for the year ending December 31, 1916, are as follows:

Revenue passengers carried.....	4,671,402
Transfer passengers carried.....	612,018

Total passengers carried.....	5,283,430
-------------------------------	-----------

Passenger car mileage.....	906,813

Passenger Revenue .....	\$198,957.34
-------------------------	--------------

Other Revenue .....	13,932.98
---------------------	-----------

Total Revenue .....	\$212,890.32
---------------------	--------------

Operating Expenditure .....	\$191,356.68
-----------------------------	--------------

Operating Surplus .....	21,533.64
-------------------------	-----------

## ELECTRIC LIGHT AND POWER PLANT

The electric light and power system is owned and operated by the city. This utility is not only self-sustaining, but revenue producing. For the twelve months ended December 31, 1916, this utility shows a surplus of \$1,937.99 after providing for all operating and fixed charges and \$34,500 taxes on plant.

The generating plant at old power house consists of four boilers, aggregating 1,000 H.P.

One 450 K.W. low pressure turbine generating unit.

Two 400 K.W. direct current railway units, vertical engine type.

One 1,200 K.W. motor converter, converting from 2,200 volt three phase to 600 volt direct current.

A new power house has been completed in which is installed the following additional apparatus: Two 1,500 K.W. high pressure turbine generating units; one 3,000 K.W. high pressure generating unit; and six boilers, 3,000 H.P. capacity.

The old plant is used jointly by the Electric and Waterworks Departments as a sub-station and pumping station.

Some 581 arc and 50 incandescent street lights are in use.

## REFUSE DISPOSAL SYSTEM

Regina has now in operation one of the most modern Refuse Disposal Plants on the continent. All refuse collected from the city is hauled to a Central Transfer Station, where it is loaded into steel dump cars. From the Transfer Station, which was specially constructed for this purpose at a cost of \$20,000, the refuse is transferred over to the street railway to the incinerating plant at the Disposal Works, a distance of two and a half miles. The Incinerating Plant, recently constructed at a cost of \$64,000, has a capacity of 110 tons per 24 hours and is modern in every particular. It is proposed to utilize the steam generated at the plant to drive the pumps at the Disposal Works and to light the grounds.

## WATER WORKS SYSTEM

The water works system is owned and operated by the city. The supply of water is obtained from springs and artesian wells at Boggy Creek, about eight miles northeast of the city. A dam constructed across the Creek impounds about 100,000,000 gallons of water, which replenishes the Creek in times of drought. Forty-five wells have been sunk through clay to the water-bearing gravel bed found at an average depth of 100 feet. These wells overflow and yield pure sparkling water. Regina is in a unique position, as it is the only known instance of a large city deriving the bulk of its supply of water from overflowing artesian wells. A further number of wells will be sunk from time to time as requirements increase. The water is collected into the Barton Pump Well (270,000 gallons capacity), and raised into the Tor Hill reservoir by means of two 2,000,000 gallons per day Turbine Pumps driven by Oil Engines. Tor Hill Reservoir is a circular reinforced concrete construction. Has a capacity of 5,000,000 gallons and stands about 125 feet above the city level; it is 202 feet in diameter and the maximum depth of water is 25 feet. The spring water is conveyed by 15-inch vitrified pipe to the compensating basin, and thence by 10-inch cast iron main to the City Pumping Station. The artesian well water gravitates from Tor Hill reservoir to the city through 18-inch main. An additional 25-inch main will be laid to supplement the foregoing.

A new rectangular reinforced concrete reservoir is situated near the City Pumping Station. It is 250 feet long, 153 feet wide, and holds 21 feet of water, its capacity is 5,000,000 gallons.

The Compensating Basins have a capacity of 1,065,000 gallons.

There are installed at the City Pumping Station two 2 1-2 million gallon per day steam driven pumps, which can be operated in parallel or in series and furnish a pressure of 60 and 120 pounds per square inch respectively. There are also two steam driven horizontal direct acting pumps, and two 3 1-2 mill steam turbine driven pumps which can be operated in parallel or in series.

The City Council last year authorized the purchase of water meters to complete the extra metering of all services in the city.

The installation of these meters is now about completed.

The normal domestic pressure by gravity is 40 pounds per square inch; it can be increased by pumping.

The distributing system consists of two trunk mains 24 inches in diameter, and one 18-inch, with a Venturi meter on each line, the gridiron connections range down to six inches.

### PARKS

In different parts of the city grounds have been laid out for cricket, football, baseball, lacrosse and tennis, while the city has about 257 acres for park and recreation purposes, valued at \$3,300,000. A splendid feature of the city is the children's playgrounds, located in different parts of the city.

**Wascana Park**—Containing about 45 acres and situated to the south of the city, has a frontage of about a quarter of a mile along Wascana Lake, which extends for nearly two miles east, affording excellent facilities for boating, of which full advantage is taken. There is a large boat club building and a boat livery in the park. There is also a bathing house, which is open for the use of the public. A bandstand occupies an appropriate position in the park.

This park, adjoining as it does the grounds of the Regina College, and having an outlook over the lake to the Parliament Buildings and grounds, offers excellent facilities for development as an ornamental park.

**Victoria Park**—Which contains over seven acres, situated in the centre of the city, is laid out as an ornamental garden.

**Dominion Park**—Containing about eight acres, is devoted to athletic games. It is in the centre of the warehouse district and affords exceptional advantages to men employed in the district and to the athletic and sporting element of the public generally.

**Alexandra Park**—Is used as a children's playground and is equipped with suitable gymnastic apparatus.

**Stanley Park**—During the season of 1915 was replanned and laid out in an appropriate form to suit the surroundings with new walks, flower beds, trees and shrubs. This park forms an appropriate frontage for the Union Depot of the Canadian Pacific and Canadian Northern Railway Companies.

# University of Saskatchewan

(Saskatoon)

The University is situated on the east side of the south branch of the Saskatchewan river. Its site comprises 1,333 acres. About 300 acres, with frontage of over half a mile on the river, have been set apart for a campus. A portion of the quarter section south of the campus is devoted to plot work, the land being virgin prairie.

The College building is about 220 feet long and 52 feet wide with wings of about 111 feet in length and 30 in width. At the rear is a large hall capable of seating between 500 and 600 people. This building will be used for teaching purposes in Arts and Agriculture. It is located in a position convenient to the Agricultural, Engineering, Horticultural and Dairy buildings, the Stock Pavilion and Farm buildings so that in time it may be devoted exclusively to the College of Agriculture. Near it are placed the residences for students.

## COLLEGE OF AGRICULTURE

The College of Agriculture is a part of the University and stands in the same relation to the University as does the College of Arts and Science. It has a number of buildings planned and equipped for carrying on its particular work and a staff of its own for the purpose of giving instruction especially in the technical subjects and elementary work in English, Mathematics and Sciences. Its laboratories and equipment are under certain limitations and restrictions, available to students in the other colleges of the University for the purpose of scientific research.

The aim of the College is to give the students under its care a good, practical training in the different technical subjects that bear upon the various phases of agriculture, such as animal husbandry, field husbandry, farm mechanics, farm engineering, dairying, horticulture, tree planting and others; to give them a good, liberal education in various other branches such as will enable them to adapt themselves readily, without great loss of time and energy, to new and varied conditions, and to fit them for their duties as good citizens.

The University estate consists of the campus, about 293 acres, and the College Farm, 1,040 acres. The College Farm proper consists of 880 acres.

## THE OBJECTS OF THE ASSOCIATION

The Association of the American Directory Publishers is composed of reputable City Directory Publishers, organized for the general advancement of the Directory business. Any person, corporation or firm engaged in business as owner and publisher of a City Directory in the United States or Canada, who shall qualify as competent to gather information and compile a City Directory and furnish satisfactory references, is eligible to membership.

The objects of the Association are:

First. The advancement of the Directory business and the improvement of Directories by the interchange of ideas and the exchange of experienced employees

Second. To provide protection to the public against fraudulent advertising schemes which operate under the name of Directories, and to drive unprincipled promoters of the same out of business.

Third. To provide permanent and profitable employment to competent, industrious and honest Directory canvassers and compilers.

Fourth. For the mutual protection and advancement of the established and prospective interests of all who may become members, by personal advice and assistance of members as may be mutually satisfactory, desirable or advisable, and by such other means as may, from time to time, be shown to be wise, proper and lawful.

**\$100.00 REWARD** will be paid by the Association for the arrest and conviction of any person or persons engaged in publishing, collecting or canvassing for any fraudulent or fake Directory.

## Directory Library

A Library of City Directories is maintained at the REGINA PUBLIC LIBRARY for the free use of our patrons. As the latest books are issued they will be added to the Library, thereby keeping it up-to-date from year to year.

## Advertising Regina City

The REGINA CITY DIRECTORY is placed in the Public Libraries in Canada and the various Directory Offices and Libraries throughout the United States and Canada, where it serves the public as a valuable book of reference, and the city it represents as a splendid standing advertisement, for no other publication can reflect so much the importance of the City, its Growth, its People with their Trades and Professions, its Churches, Schools, Societies, Banks, Railroads and all other Institutions and Organizations. The wide circulation of the Directory enables Capitalists and Business Men in every Locality to communicate with citizens and to note the progress and improvements the Directory annually records.
